engage a few lectures for the students of the host College during the period of the visit. The Librarian of each institution could also be a member of this visiting team. At least one of the faculty members will be a member of the College Internal Quality Assurance Cell.

4. The Principal of each institution will also visit the other institution at least once during the tenure of the MOU.
5. The two institutions will share their practices and experiences in the areas of curriculum development, teaching, learning and evaluation, outreach activities and collaborations.
6. The two institutions will also, to the extent possible, collaborate on research projects and consultancy projects.
7. The two institutions will share practices and procedures relating to their Library and Information Centres.
8. The two institutions may share study material, course content, etc. developed by the faculty members.
9. The two institutions will share practices and procedures of their Internal Quality Assurance Cells.
10. The host College will not bear any financial liability of the visiting faculty members and/or students, and will not be responsible for the travel, accommodation, or any other arrangements of the visiting institutional members.

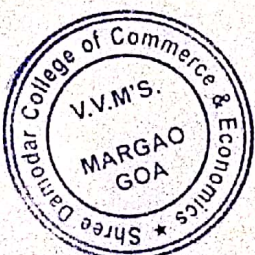

11. Confidentiality

Shree Damodar College and Poona College agree to hold in confidence all information / data designated by the institutions as being confidential which is obtained from either institution or created during the performance of the MOU and will not disclose the same to any third party without written consent of the other institution.

12. Duration of MOU

This MOU, unless extended by mutual written consent of both institutions, is valid for a period of 5 (five) years from the effective date specified.

SUBJECT: REGISTRATION OF JRC/YRC GROUPS.

Dear Sir/Madam.

The Junior/Youth Red Cross is the branch of the Indian Red Cross Society constituted by Act of Parliament in 1920. It is a non-political, non-religious, non-sectarian and international organization working for the cause of relief and medical services as auxiliary to the Govt. of India. The Junior/Youth Red Cross aims to inculcate in the students the ideal of peace and service in relation to the care of their own health and that of others, the understanding and fostering of international friendliness and dissemination of information on Red Cross.

The Pune District Junior/Youth Red Cross has many active Junior/Youth Red Cross units in primary schools, high schools and colleges. Various activities are undertaken in educational institutions. Activities are designed in such a way that students will learn and practice principles of Junior Red Cross.

The activities mainly include lectures, visits, exhibitions, demonstrations, competitions, state and interstate camps, first aid training and disaster management training. These activities help in shaping the character and personality of students.

Counselors training courses are conducted to train and guide the teachers to conduct the activities. Besides our field officer is a link between the teachers and Junior Red Cross office. You are requested to enroll your institution as a JRC/YRC member by paying registration fees as mentioned below. Necessary form is enclosed herewith.

Registration Fees:

1. Rs. 200/- For 1 year for Primary and High Schools.
2. Rs. 400/- For 1 year for Colleges.

Hoping for your kind cooperation and active participation.

Thanking you,

Yours faithfully,

Subject :- Nominations for an Inter-Collegiate Elocution Competition organized by Junior/Youth Red Cross, Pune District Branch, Pune

Respected Sir,

With reference to above subject, we are submitting the nominations of our college for an Inter-Collegiate Elocution Competition organized by Junior/Youth Red Cross, Pune District Branch, Pune. The following senior college students are participating for this Elocution Competition:

Sr. No.	Name of Participant Student	Class	Theme of the Poster
1	Shweta Sunil Kharat	S.Y. B.Com.	अवयवदान, सर्वश्रेष्ठ दान
2	Momin Nimra Zubair	T.Y.B.A.	Organ Donation, Best Donation

Kindly accept our nominations for the said competition.
Thanking you

Yours Sincerely

THREE DAY FIRST AID TRAINING CAMP

Indian Red Cross Society, Pune organised three day first aid training camp. They invited teams from colleges to learn First Aid Facility required in critical situation to save people from health danger. This is three day extensive program comprises basic and advanced training related with First Aid Facility. First aid is the first and immediate assistance given to any person suffering from either a minor or serious illness or injury with care provided to preserve life, prevent the condition from worsening, or to promote recovery. It includes initial intervention in a serious condition prior to professional medical help being available, such as performing cardiopulmonary resuscitation (CPR) while waiting for an ambulance, as well as the complete treatment of minor conditions, such as applying a plaster to a cut. First aid is generally performed by someone with basic medical training.

Mr. Kulkarni, Secretary, Indian Red Cross Society, Pune Branch inaugurated this program. Many experts from medical field trained the volunteer students from different colleges. Mr. Hashim Ansari and Ms. Soleha attended this three day program from our college. Principal Dr. Aftab Anwar Shaikh inspired participant students at this occasion. Mr. Mukhtar Shaikh, Coordinator, Red Cross Unit supervised the entire activity.

MEMORANDUM OF UNDERSTANDING

Between

**GOVERNMENT DEGREE
COLLEGE**

SOPORE, JAMMU & KASHMIR

&

**POONA COLLEGE OF ARTS,
SCIENCE AND COMMERCE
CAMP, PUNE, MAHARASHTRA**

Government Degree College, Sopore, Jammu & Kashmir and **Poona College of Arts, Science And Commerce, Pune, Maharashtra** recognize their strengths in research and education in one or more disciplines of Department of Chemistry and their mutual interest in engaging themselves in academic cooperation.

Government Degree College, Sopore, Jammu & Kashmir and **Poona College Of Arts, Science And Commerce Pune, Maharashtra** therefore agree to establish a program for academic cooperation in the areas of mutual interest, and in accordance with terms and conditions set forth in this Memorandum of Understanding (MoU).

A. OBJECTIVES

The goal is to foster collaboration, provide opportunity for global experience and to facilitate advancement of knowledge on the basis of reciprocity, best effort, mutual benefit, and frequent interactions. Government Degree College, Sopore, Jammu & Kashmir and Poona College of Arts, Science and Commerce Pune, Maharashtra agree:

- a) To exchange information on research and educational programs.
- b) To exchange information on teaching, learning material and other literature relevant to their educational and research programs.
- c) To jointly organize short-term continuing education programs on topics of mutual interest and to invite each other's faculty to participate therein.
- d) To jointly organize seminars, conferences, or workshops on topics of mutual interest and to invite each other's faculty to participate therein.
- e) To jointly propose and engage in research or training programs to invite each other's faculty to participate therein.
- f) To exchange, on a reciprocal basis, students at Undergraduate and Graduate for limited periods of time for purpose of education and /or research.

Government Degree College, Sopore, Jammu & Kashmir and **Poona College of Arts, Science and Commerce, Pune, Maharashtra** further agree that detailed terms and conditions that guide each activity identified above will be separately determined and agreed upon by the two institutions.

B. STUDENT EXCHANGE

Government Degree College, Sopore, Jammu & Kashmir and Poona College of Arts, Science and Commerce, Pune, Maharashtra agrees that student exchange will be guided by principles listed below. A home institution refers to the institution where a student is a full-time student, and from where he/she is expected to graduate. A host institution refers to an institution that receives a student for a brief period of time to undertake a pre-determined program of study or research.

- a) Exchange students will be selected by mutual agreement between the home institution and the host institution.
- b) An exchange student will continue to be treated as full-time student at his/her home institution.
- c) An exchange student will be considered as full-time "exchange" student at the host institution. d) The host institution will evaluate an exchange student's performance in each course or module, award a letter grade or marks, and issue a letter to that effect.
- d) If an exchange student has undertaken research, then the host institution will evaluate the exchange student's performance in the research, and issue a letter to that effect, together with a technical report of the research carried out.
- e) If an exchange student has undertaken research, then the home institution will take note of the performance evaluation and the technical report, and take steps in accordance with its own procedures.

C. JOINT CONFERENCES, WORKSHOPS AND SHORT-TERM COURSES

Government Degree College, Sopore, Jammu & Kashmir and Poona College of Arts, Science and Commerce Pune, Maharashtra agrees to help identify and invite faculty members from the other institution to participate in conferences, workshops and short-term courses. The terms and conditions for such participation will be worked out by mutual agreement between Government Degree College, Sopore, Jammu & Kashmir and Poona College Of Arts, Science And Commerce Pune, Maharashtra .

D. DURATION

This MoU will take effect from the date it is signed by representatives of the two institutions. It will remain valid for five year from (07/01/2019 to 06/01/2024) and may be continued thereafter after suitable review and agreement. However, Government Degree College, Sopore, Jammu & Kashmir and Poona College of Arts, Science and Commerce, Pune, Maharashtra, will ensure that all activities in progress are allowed to complete successfully.

ABSTRACT

Herein, we present a practical, more efficient, environmentally friendly method for the synthesis of 1,5-benzodiazepine via condensation of benzene-1,2-diamine with commercially available ketones. The reaction was performed using various heterogeneous clay based catalysts, including Montmorillonite-K10, Montmorillonite-KSF, Kaoline, and bentonite, and also other clay supported transition metals based catalysts such as, Cu(II)-clay, Pd/Montmorillonite-KSF, Ni/Montmorillonite-KSF, Co/Montmorillonite-KSF, Sn/KSF, and Zn/Montmorillonite-KSF. Among various metal-clay based catalysts tested, Copper (II) adsorbed on clay nanocatalyst was found to be very efficient and showed promising activity for the formation of nitrogen containing heterocycle compound i.e. 1,5-benzodiazepine with excellent yields. An assortment of structurally diverse 1,5-benzodiazepine was prepared in good to excellent yields from easily available starting materials by using this protocol. The catalyst was found to be applicable to aromatic, heteroaryl and aliphatic ketone such as cyclic ketones as well as acyclic ketones.

1. Introduction

Benzodiazepines (BDZ's) is a privileged heteroaromatic molecule and form an important class of pharmaceutically active compounds and their synthesis is of great importance for medicinal chemists and pharmacists in the field of medicinal and pharmaceutical chemistry owing to their application as analgesic, anticonvulsant, anti-inflammatory, sedative and hypnotic activity (Christian and Demeunynck, 2007; Pathak et al., 2007; Moody et al., 2007; Barrett et al., 2007; Puodziunaite et al., 2000). The analogues of 1,5-benzodiazepines are also used in pigments industries, dyes

and paints industries as well as for acrylic fibers in photography related technology. Further, benzodiazepines scaffolds have been used as starting material for the synthesis of other compounds such as oxazinobenzodiazepines benzodiazepines, oxadiazolo, triazolo benzodiazepines and furano-benzodiazepines etc (Khanna et al., 2014; El-Snyed et al., 1999; Chimirri et al., 1990). Benzodiazepines are generally synthesized from 1,2-diaminobenzene (OPD) by the condensation with simple ketones, α,β -unsaturated aromatic or aliphatic carbonyl compounds. So far different types of acidic reagents have been applied for this purpose, such as, PVP-FeCl₃, Ag₃PW₁₂O₄₀, Al₂O₃/P₂O₅, zeolite, MgO/POCl₃, BF₃-etherate, Yb(OTf)₃, polyphosphoric acid, sodium borohydride (NaBH₄), gallium triflate (Ga(OTf)₃), (Lloyd et al., 1965; Younes, 2011; Climent et al., 2009; Baseer and Khan, 2012) lead nitrate (Pb(NO₃)₂), L-proline (amino acid), sulfated zirconia etc. apart from acetic acid as catalyst under microwave conditions and molecular iodine based catalysts have also been widely used (Ganai et al., 2006; Sivamurugan et al., 2004; Bennamane et al., 2008; Jadav and Kim, 2013; Chadha et al., 2011; Zangade et al., 2011; Sharma et al., 2011). However, it is found that many of the reagents suffer from one or more drawbacks due to drastic conditions such as long reaction times, harsh reaction conditions, formation of undesired

side product or occurrence of many side reactions, tedious work-up procedure and low yields of the product. In addition, the previously used solid phase catalysts showed low surface area and low pore volume which do not prove to be more efficient for performance because of not effective adsorption on the surface and hence poor yield benzodiazepines.

Many of the reported methods suffer with drawbacks in terms of atom economy, substrate scope, reaction time, reaction conditions, unsatisfactory yields, elevated temperatures, and/or protected syntheses of substrates. Consequently, there is a need to develop environment friendly, operationally simple and mild methods to obtain this privileged pharmacophore from a broad class of readily available synthetic reagents.

Clays are considered to be most cost-effective and environmentally friendly catalysts for organic transformations. The metal doped clays can be the hybrid materials with combined catalytic rewards of metal salts and clay catalysts. Thus, in continuation of our interests (Shaikh et al., 2017; Dar et al., 2015a; Farooqui and Baldev 2015; Dar et al., 2015b; Dar et al., 2014), we herein report the synthesis of benzodiazepine from readily available OPD and commercially available ketones using a heterogeneous Cu(II)/Montmorillonite clay catalyst. The advantages of the system include, short reaction times, catalyst recyclability, neat conditions, remarkable activity without any additives and amenable for synthesis of diverse benzodiazepines.

2. Materials and methods

2.1. Preparation of the Cu(II)-clay nanocatalyst

Cu(II)-clay nanocatalyst was prepared by introducing calculated amount of aqueous copper oligomer (prepared from copper(II) chloride precursor) to obtain a 10 wt% copper loading on to commercially available clay (Montmorillonite KSF) (purchased from Sigma-Aldrich). The as-prepared mixture was stirred for overnight (about 12–15 h). After the optimized time, it is filtered and thoroughly washed with distilled water several times to remove chloride ions. The solidified material in the form of cake is formed which is separated and dried in an oven at about 100–125 °C temperature over a period of 10–12 h, the obtained solid is then powdered and calcined in air at 450 °C for 2–3 h. The calcined product is referred to as Cu(II)-clay nanocatalyst and was used as such in all the reported experiments. Detailed preparation procedure is given in our previous publication (Bashir et al., 2018). The prepared catalyst was characterized by XRD analysis and the spectrum obtained was found to correspond to previously reported data (Fig. 1).

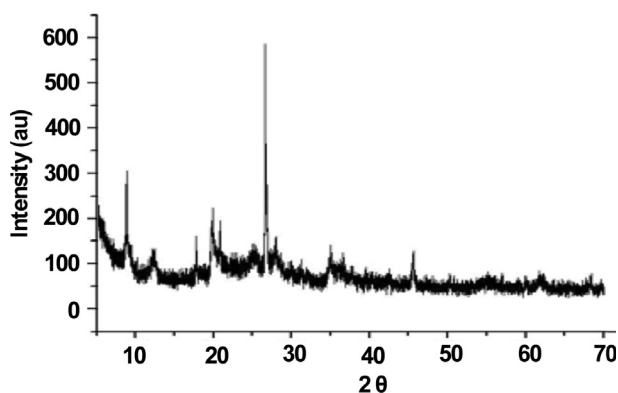

Fig. 1. XRD pattern of fresh Cu(II)-clay nanocatalyst.

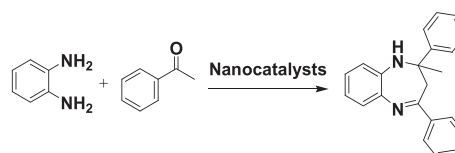

3. Results and discussion

In this method, we have employed Cu(II)-clay nanocatalyst with 10 wt% copper loading, which was pre-optimized. The best yield was found by using 10 wt% copper loading, this might be due to the optimum nano-size of the catalyst, which may contain increased number of active catalytic sites. Whereas, the higher copper loading may leads to the enhancement of particle size of CuO which adversely affects the surface area of the resultant catalysts and also lowers the formation of active sites. On the other hand, lowering the copper content to below 10% also decreases the activity of the catalysts, due to the absence of sufficient quantity of active material (Cu in this case).

In order to optimize the reaction condition different parameters were varied including the amount of reactants and catalyst, and following conditions were found to be best suited; 5 mg of Cu(II)-clay nanocatalyst, 2 mol of acetophenone, O-phenylenediamine (1.2 mmol). The reaction was completed within 10 min, which was confirmed by TLC (Scheme 1).

To begin with, the reaction of acetophenone and o-phenylenediamine (OPD) in toluene as solvent was performed at room temperature which did not yield any product (Table 1 entry 1). This led us to increase the reaction temperature to 100 °C, which yielded the formation of corresponding benzodiazepine in about 12% yields. (Table 1 entry 2 based Scheme 1). These results warranted optimization of the reaction conditions.

The reactions is examines by using different solvents as medium for the reaction. We have observed that organic solvents various solvents includes methanol, dimethyl sulfoxide, THF, dichloromethane, chloroform and ethanol have been used and tested for the quality of reaction completion. We found that polar solvents give good to excellent yields. We moved for the solvent free reaction conditions and got exciting results. We investigated the reaction under sonication and microwave conditions. Interestingly, the reaction in microwave resulted in quantitative conversion to the products under solvent free conditions in 10 min to study the effect of the amount of catalysts needed for the transformation, various reactions were performed by varying the quantity of catalyst by keeping other parameters constant. It was revealed that 5 mg of catalyst was found to be efficient which yielded ~98% of conversion (Table 1). Apart from this, the impact of other clay catalysts on the aforementioned reactions was also studied (Table 2). The catalysts such as Montmorillonite- K10, Montmorillonite-KSF, Kaoline, and bentonite failed to give any product. The Pd/Montmorillonite-KSF though gave corresponding product in low yields. The other montmorillonite based catalysts viz., Ni/Montmorillonite-KSF, Co/Montmorillonite-KSF, Sn/Montmorillonite- KSF, and Zn/Montmorillonite-KSF have also been tested and found to give the products in very less amounts. Furthermore, the use of PdCl₂ and CuO as well did not offer any increased yield of product formation. However, the Cu(II)-clay nanocatalyst was found to show promising results compared to CuO for the model reaction under optimized conditions. This may be due to the high dispersion and the nano-sized character of Cu (II) ions on clay support. After investigating the various reaction procedures, it was confirmed that the use of 5 mole % Cu(II)-clay

nanocatalyst is the optimum amount of catalyst, and the optimum reaction time is 10 min for best results.

Efficiency of the catalyst can be judged from its recyclability property. The catalyst was recycled by using model reaction between commercially available acetophenone (2.0 mmol), o-phenylenediamine (1.2 mmol) and Cu(II)-clay nanocatalyst (5 mg) under microwave and solvent free conditions. Excellent result have been shown by the recycled catalyst for the above reaction, which depicts that there is persistent in activity of nanocatalyst without significant loss of activity and the catalyst could be easily recovered by simple filtration and reused, leading to corresponding 1,5-benzodiazepines in quantitative yield even up to five times reuse of the catalyst. (Fig. 2).

The promising and effective performance of the Cu(II)-clay nanocatalyst in the synthesis of 1,5-benzodiazepine stimulated us to use this protocol for the synthesis of substituted 1,5-benzodiazepines conjugates using different commercially available substituted benzene-1,2-diamine (o-PDA) and diversified ketones as precursor for heterocyclization (Scheme 2) and the results obtained are shown in Table 3. In all examples, the reactions proceeds with high rate and thus complete within very short reaction time viz. 8–10 mins. The nanocatalyst showed promising activity in all the types of precursor used in this transformation, affording 90–98% isolated yield of the corresponding derivatives of 1,5-benzodiazepine. Electron donating groups, e.g. halogens, methoxy, as well as electro withdrawing groups, e.g. nitro group, have no significant effect on the reaction yields. It was experimentally confirmed that the catalyst Cu(II)-clay nanocatalyst showed superior performance with high yields in a relatively shorter reaction time.

4.1. General procedure for the synthesis of 1,5-benzodiazepines

A mixture of o-phenylenediamine (OPDA) (**1**) (1 mmol) with commercially available ketone (**2**) (2.5 mmol) and catalyst (5 mol %) were taken into a synthesizer used for microwave governed reaction i.e. CATA - R I operating at 300 W, and irradiated for 8 min. The progress of the reaction was checked by thin layer chromatography by using ethyl acetate polar solvent (10%) and pet ether used as non polar solvent (90%) for mobile phase After completion of the reaction, reactions was quenched by adding ethyl acetate and filtering gave product which on purification by column chromatography subjected for physical and spectral data analysis. The filtrate was concentrated under high vacuum. The crude products were purified by crystallization and were further characterized by nuclear magnetic resonance spectroscopy (NMR) and

5. Conclusion

Clay supported transitional metal based materials have emerged as valuable catalysts for various organic transformations including the preparation of Benzodiazepines. Preparing such clay based catalysts supported by different transition metals introduces new possibilities for catalysis due to their excellent catalytic properties including selectivity and reusability. In this study, we have demonstrated the synthesis of Cu(II) supported clay based nanocatalysts, which was used for the synthesis of different conjugates of 1,5-benzodiazepines. Among various as-prepared nanocatalysts, Cu(II)-clay nanocatalyst has demonstrated excellent activity for the preparation of 1,5-benzodiazepine derivatives by condensation of o-phenylenediamine with commercially available ketones. In order to investigate the effect of parameters such as reaction time, and solvents on the quality and quantity of products various reactions were performed by varying these parameters.

This Memorandum of Understanding (MoU) is made between the Y&M AKI's Poona College of Arts, Science & Commerce and the Vision Foundation, Pune setting down rules for cooperation between NGO and the aforementioned Institution. It provides a framework within which all collaborative activities and projects will be undertaken in the Poona College Campus.

Purpose

The purpose of this MoU is to define the operational framework governing Cooperation between the two Parties in the following areas:

- (a) Participation of Campus2Corporate program and constituents in the regular activities of AKI's Poona College;
- (b) Exploration of opportunities for jointly extending learning services provided by AKI's Poona College;
- (c) Organization of joint-activities for AKI's Poona College and Vision Foundation, Pune;
- (d) Enhancing Technical skills in all the Computer Science students of AKI's Poona College;
- (e) Participation in experience-sharing and institution-building activities;
- (f) Exposure visits and facilitation of leadership development programmes/activities for the students of AKI's Poona College.
- (g) Providing world class training which meets the industry needs.
- (h) Vision Foundation will help students to become more compatible to meet the need of industry
- (i) Vision Foundation would like to adopt 25 students from AKI's Poona College.
- (j) Train them on technical skills, soft skills and help them to excel in interviews

Specific areas of collaboration

The framework of cooperation between Vision Foundation and AKI's POONA COLLEGE includes the following priority areas:

- a) There are many areas which need to be worked upon, below are the points, which have been considered for improvement of Computer Science students. Quality Factor, Way of Learning/Teaching, Lack of Infrastructure, HR Recruitment, Process Ratio of Engineering graduates each year versus Number of jobs available, Automation Factor, Government Attitude (quality v/s quantity), Students Attitude etc. We will work on most of the areas to train students.
- b) Training for students, especially in the areas of training such as Personality Development, Interview Preparation, Resume Writing, Soft Skills.
- c) Special Boot camps will be organised for all the students, IOT Internet of Things, LINUX Open source, Machine Learning, Artificial Intelligence, Robotic Processing Automation, BIG data, Cloud Computing, Web Development, and App development.
- d) Adopted Students will go through all the special training as per the requirement of Industry and their interest area.
- f) Technical assistance will be provided in the form of facilitating opportunities for strengthening all the students and adopted students capacity in terms of providing learning services; Soft Skills, Technical Skills, Boot Camps etc.

Terms and conditions

The two institutions will endeavour to cooperate as follows:

- (a) Identification of standard courses relevant for AKI's POONA COLLEGE students to attend in Campus premises only;
- (b) Promotion of activities within the network of AKI's POONA COLLEGE partners and vice versa;
- (c) definition of needs of the students of AKI's POONA COLLEGE to be satisfied by tailored exposure visits and leadership development activities in AKI's POONA COLLEGE and other places where practice has advanced;
- (d) Design, organization and implementation of Campus2Corporate program will be done by VISION FOUNDATION and learning events (e.g. Academies) to be attended by AKI's POONA COLLEGE students, in Pune,

(e) Design, organization and implementation of joint-learning and training programmes for constituents in Pune (in AKI's Poona College Campus);

(f) Identification of opportunities for involving Centre specialists in the design and implementation of AKI'S Poona College activities as well as Vision Foundation experts in the activities. AKI's Poona College students could benefit from Vision Foundation experts knowledge of, and involvement in, the industry compatibility context for preparation of training material, sharing faculty and subject matter experts;

(g) Collaboration on conducting technical sessions and arrangement of Conference halls and Labs for demonstration to the extent that they fit and support the mandate and thematic interest(s) of AKI'S Poona College, and in the knowledge that outcomes reinforce the process of designing learning experiences and other major activities of both organisations.

The AKI'S Poona College and Vision Foundation agree that the financial arrangements in relation to the Initiatives implemented within the framework of this MoU shall be determined on a case by case basis with due regard to the need of organizations to recover costs.

Limits to agreement

The AKI's POONA COLLEGE and VISION FOUNDATION hereby acknowledge their agreement in principle to the above mentioned framework and areas of cooperation. This MoU does not constitute any formal obligation on behalf of either AKI's POONA COLLEGE or VISION FOUNDATION to provide support for any individual project, activity or product.

Additional areas of collaboration may be identified during the lifetime of this MoU.

Timeframe and financial conditions

This MoU will continue for year 2018- 2019 from the date of signature. It is understood that each joint-activity shall be formalised through the elaboration and signature of a specific agreement including a technical proposal and a cost estimate that must be approved by both parties to this memorandum prior to implementation of the activity.

Other parties

Other parties may join this collaboration:

- (a) In the context of single activities or projects on a case by case basis, as appropriate;
- (b) In the context of the overall MoU and the signatories to a revised form of this MoU, provided that the original signatories consent with written approval.

Copyright

9. AKI's POONA COLLEGE and VISION FOUNDATION agree on the following rules for the protection of materials used in the training and learning activities:

(a) The NGO VISION FOUNDATION will retain ownership and copyright of all training and learning materials and media developed under this MoU by its students and consultants, understanding that AKI'S POONA COLLEGE can use this material for training and learning purposes;

(b) All training and learning materials and media referred to under sub-paragraph (a) will include the following note on the cover page:

(c) VISION FOUNDATION will retain ownership and copyright of all training materials and media developed under this MoU by its students and consultants, understanding that the AKI's POONA COLLEGE, can translate this material for training and learning purposes;

Further, Mr.Zulfikar Sayyed took over the class with his prime introduction about his qualification and experience with the people around and started with a quick review of the previous session. He was very encouraging and made everyone an active participant. In this personality development session he discussed in brief about the word “PICTURE” and presented a completely new perspective of the word. He also gave many examples and shared his own experiences. The students enjoyed spending time with him and learnt about personality development. He shared various ways to crack an interview and make an impactful mark in the very first interview.

Apart from talking about personality, he also made students work on their pronunciation skills and improving accents. The event also witnessed the love Mr. Zulfi possessed in sharing his experiences with an open heart to motivate and mould all the students in the best possible manner. His involvement boosted every individuals’ confidence that would make them stand in a crowd but quite differently. His love for the benefit of students was completely heartfelt.

At the end of the workshop Zulfiqar Sayyad stated that, “It’s a lot of fun to see young kids excelling in the field of education with complete dedication to make an impactful change in the society. I hope to see them as rising stars in the upcoming year.”
