CURRICULUM

1) Course Description:

Business English is a basic course designed for first year students of English as a second language who wish to improve their written and spoken business communication skills. The course focuses on level-appropriate grammar, introduces vocabulary specific to various business domains, and familiarizes students with the finer points of business etiquette and business correspondence. Presentation skills are also dealt in this course. It also highlights the format of letters, memos and resumes.

2) Course Objectives:

The Business English course is designed to prepare students to use English in a present or future work situation. Students will develop English skills with a focus on business contexts and environments, and they will learn vocabulary that is used regularly in the business world. This course will help practice and enrich communication skills by using English in specific business settings and situations.

3) Course Outcome:

By the end of the course, the students will be able to:

- Develop basic skills to deal with people in business situations
- Increase their knowledge of key business concepts worldwide
- Write and read basic business letters and memos
- Expand vocabulary related to general business situations
- Develop confidence to deal with people and basic issues in the business world

4) Course Duration:30 Hours

5) Board of Studies:

5.	Dr. Shirin Shaikh	Assistant Professor &Course Coordinator	Poona College of Arts Science and Commerce

CURRICULUM

6) Syllabus:

Sr.No	Topic Name	Hours
1.	Introduction to Business English Course outline and Approach	02
2.	Meetings: Preparing for the meeting, setting an agenda and chairing meeting Taking notes Conversation: Being diplomatic, agreeing and disagreeing	10
3.	Business Communication (written) Writing E-mails Memos Business letters Resume Writing	15
4.	Presentation Skills	03

7. Methodology: The style of teaching will probably differ and the methodology used in this course will be a little different from general English. For example, instead of pair work and group work, the teacher will teach the students more through case studies, role play and simulation exercises. Role of the teacher is likely to be more of a facilitator when teaching meeting skills or presentation.

Summary Report of Business English Course 2019-20

English is the most widespread spoken and written language in the world. An estimated 1500 million people speak the language worldwide, out of which only 375 million are native speakers. Over 1 billion people speak it as a foreign language. Therefore English becomes all the important for effective communication.

The Importance of Good English in Business:

1. It shows ones willingness to go beyond basic business standards.
2. It helps one to communicate better with colleagues.
3. It is important for delivering presentations and speeches.
4. Good pronunciation always makes a good first impression.
5. It allows one to travel.
6. It gives one an edge in other jobs as well.
7. Finally, it allows one to express oneself in a language that everyone understands.

With this aim in mind, the Department of Commerce initiated the Business English course for the students of F.YB.Com. from January 2020 to February 2020.

A good grasp of the knowledge of English in general as well as a deep understanding of special forms are needed to successfully build a career in an international environment. This knowledge is important for both written and oral forms of communication, such as email, letters, phone calls, meetings, presentations and many more.

Learning Business English helped the students to boost the existing skills also helped them to build up completely new knowledge. These Language classes had the advantage of focusing on the student's personal needs. The learning outcome in most cases was much higher than in the regular day to day general English class.

Dr. Misbah Ansari was called as a guest speaker in the Business English course (Dated: 20.02.2020)

The students were also furnished with booklet which provided them with tips and tricks that they can follow to improve their knowledge. A combination of

business English courses and these tips and tricks definitely are most likely be the most effective way to master English in a working environment.

The Business English course aimed to help the students improve their understanding of this much specialized aspect of the language.

Students attending the Business English Course (Dated: 16.01.2020)

This course was conducted for the F.Y.B.Com students from January 2019 to February 2020. This course was conducted in four batches. The total beneficiaries for the same were 449 students . Dr. Shirin Shaikh was the course co-ordinator.

Dr. Shirin Shaikh, Course Co-ordinator conducting a session (Dated: 17.01.2020)

Course Description:

Supply Chain Management enables an organization to look very closely at all possible avenues both intra and inter-company, of reducing costs from all functions and processes; keeping always, the customer in focus. Effective supply chain management uncovers waste in all its forms at all the levels, addresses squarely the bottlenecks and inefficiencies and comes up with responsive and low cost solutions. It is today's "Strategic Tool for Cost Reduction". Successful global businesses like Wal-Mart, Toyota and Dell Computers have established nearly unassailable positions in the world markets through Supply Chain excellence.

This course is designed to expose students to the challenges involved in managing supply chains and enable them to understand the complexity of inter-firm and intra-firm coordination.

Course Objectives:

- Understand the importance of supply chain management and its core pillars (i.e., logistics, purchasing and operations management) in the formation of business strategy.
- Build foundational knowledge in supply chain management and the broad base of tools needed to analyze and improve supply chain processes
- Appreciate the power of supply chain management to contribute to a firm's overall competitive advantage while understanding the key supply chain issues and implications

Course Outcome:

- This course examines the role of logistics in the supply chain within a focal firm as well as between organizations linked within a given supply network.
- Topics cover issues such as introduction to the basic terms of logistics, distribution and transportation alternatives, the connection between logistics and marketing, the estimation of value and costs in logistics, sourcing and supply management, supply chain planning and control strategies and logistics future challenges and opportunities.
- Students will get a clear idea of the expanding role of logistics in business today.
- They will also be familiar with the principles and processes of logistics as a strategic choice in supply chain management

Course Duration: The certificate course will be of Thirty hours spread over a week

(for students of F.Y.B.Com.)

The Department of Commerce, PG and Research Centre organized a 30 hour Certificate Course in Logistics and Supply Chain Management for the students studying Marketing & Salesmanship at the F.Y.B.Com Level. This course started from 9th January 2020 onwards it was designed and coordinated by Assistant Professor Mohammed Fazil Shareef under the able guidance of Principal Dr. Aftab Anwar Shaikh and HoD Dr. Nasrin Khan.

108 students attended this certificate course. The students were provided with booklet which contained data about the course description, objectives, outcome, duration, Board of Studies, syllabus, methodology and course content.

The objectives of the course were as follows:

- To understand the importance of supply chain management and its core pillars (i.e., logistics, purchasing and operations management) in the formation of business strategy.
- To build foundational knowledge in supply chain management and the broad base of tools needed to analyze and improve supply chain processes
- To appreciate the power of supply chain management to contribute to a firm's overall competitive advantage while understanding the key supply chain issues and implications.

Students engrossed in the session on SCM

The course covered topics like concept, objectives, & significance of Supply Chain Management, Essential stages in developing a successful SCM, physical distribution,

marketing channels its function & criteria for selection. Even the latest topics like current trends in SCM, green supply chain management, role of IT in SCM supplier relationship management were covered.

The course was divided into three parts the first part was conducted by the coordinator Mr. M.Fazil Shareef himself whereas the second part and the third part were conducted by an external faculty and an industry expert respectively.

Coordinator Mr. M.Fazil Shareef addressing the students

Ms. Raisa Shaikh a faculty from a renowned college in Pune and an active member of Indian Institute of Materials Management was called to deliver lectures on the topic of physical distribution. She explained the definition and meaning of marketing channels and the role they play in physical distribution and hence in supply chain management. She gave live examples and put forth her points with the help of case studies. She also explained how channel management and channel selection is essential in reducing the cost thereby increasing the profit margins not compromising on time deadlines. She went on to explain the process of channel selection with the help of a few videos.

Ms. Raisa Shaikh explaining the topic of Marketing Channels

To make the students aware about the recent changes, advances and trends in supply chain management, the coordinator thought of calling a person from the industry who has hands on experience in this field. Mr Zahid Shaikh, Director of ZS Enterprises which is a logistics and supply chain management company was invited. He is also a member of Indian Institute of materials management.

Mr. Zahid shaikh, Director ZS Enterprises explaining Recent trends in SCM

Mr Zahid shaikh who has expertise in supply chain management went on to explain the role played by IT in SCM, he also explained how we can create a green supply chain management system thereby contributing to the environment and reducing our cost at the same time. Mr.

Zahid stressed on importance of supplier relationship management. Being from the industry he explained the trends and the changing arena of supply chain management

The Course Outcome was as follows:

- The Students have got a clear idea of the expanding role of logistics in business today.
- The students have become familiar with the principles and processes of channel selection as a strategic choice in supply chain management
- The students understood the importance and role of IT and Green SCM

Students highly appreciated the fact that a course of this kind was organized for them. They were extremely thankful to the principal and staff for diligently planning and executing this course. The students in the feedback also mention that they would like to have more courses organized so that it which will help them to broaden the understanding about various aspects of Commerce and marketing which are not covered under the regular SPPU curriculum.

Report of Soft Skills Course for M.Sc. (Computer Science)

The future of work is likely to herald a wide range of new jobs, many of which can scarcely conceive today. There has been understandable attention given to the kind of skills these jobs might require. There is a lot of emphasis given to soft skills today.

It is said that hard skills may earn you an interview but it is your soft skills that will get you the job. CEOs and HR Managers today are suggesting that companies can do better if they hire people with good soft skills and then train them to develop their hard skills in the area of specialization. Lack of soft skills has been pointed out by MNCs as a reason for not preferring Indian candidates.

The department of English organised a certificate course in Soft Skills for the students of M.Sc Computer Science in the month of August 2019. Dr. Shirin Shaikh was the course Coordinator.

This soft skills course intended to develop the skills that can make the difference between a lack luster career that tops out a middle management versus one that lands one in executive suite. So many soft skills seem like common sense at first glance, but they are not commonly applied by most workers. This soft skills course gave an edge over other competitors. It also aimed to make the students job, their career and their life more rewarding and enjoyable.

The entire soft skills course was very interactive. The students took active part in understanding the topic. Students absorbed the information, shared their experiences on the issue. Dr. Shirin Shaikh with her own experiences shed light on the various challenges faced during various stages of professional life and how to overcome them, which was received with applause by the students. Total 09 students took benefitted from this course.

Report of Soft Skills Course for M.Sc. (Zoology)

In today's global world, soft skills are very much necessary for a person to get a good job as well as to be a good human being and to succeed in one's profession.

The position that our youngsters will gain in a Society will depend on their social skills that will facilitate interpersonal behavior. Qualification or status will not help one if one does not interact positively with others.

It is said that hard skills may earn you an interview but it is your soft skills that will get you the job. CEOs and HR Managers today are suggesting that companies can do better if they hire people with good soft skills and then train them to develop their hard skills in the area of specialization. Lack of soft skills has been pointed out by MNCs as a reason for not preferring Indian candidates.

With the aim of developing soft skills in the MSC. Zoology students, the department of English conducted a soft skills course of 20 sessions (90 Minutes) that commenced in the month of August and ended in the month of September 2019.

The first session opened with introducing the realities of the industry; the serious skills gap and shortage found in the industry, which was evident through various surveys and statistics. Information was disseminated regarding the industry-specific soft skills that the ever-competitive industry demands. Along with explaining the importance of how Soft Skills play an important role in professional life, Dr. Shirin Shaikh also explained this soft skills course intended to impart the training for acquiring the same. She also illustrated how acquiring these skills are crucial for professional as well as personal development.

Soft Skills Course conducted for M.Sc Zoology students (Dated: 7 September 2019)

The entire soft skills course was very interactive, students took an active part in understanding the topic. Students absorbed the information shared their experiences on the issue. Dr. Shirin Shaikh with her own experiences, shed light on the various challenges faced during various stages of Professional life and how to overcome them, which was received with applause by the students. I] DESCRIPTION OF THE CERTIFICATE COURSE: -

Databases form the backbone of all major applications today – tightly or loosely coupled, intranet or internet based, financial, social, administrative, and so on. Structured Database Management Systems (RDBMS) based on relational and other models have long formed the basis for such databases. Consequently, Oracle, Microsoft SQL Server, Sybase etc. have emerged as leading commercial systems while MySQL, PostgreSQL etc. lead in open source and free domain. While RDBMS's differ in details, they share a common set of models, design paradigms and a Structured Query Language (SQL). In this background the course would examine data structures, file organizations, concepts and principles of RDBMS's, data analysis, database design, data modeling, database management, data & query optimization, and database implementation. More specifically, the course introduces relational data models; entity-relationship modeling, SQL, data normalization, and database design. It would also introduce query coding practices using MySQL (or any other open system) through various assignments. Design of simple multi-tier client/server architectures based and Web-based database applications will also be introduced.

WHAT IS RRDBMS?

A Relational database management system (RRDBMS) is system software for creating and managing databases. The RRDBMS provides users and programmers with a systematic way to create, retrieve, update and manage data.

A RRDBMS makes it possible for end users to create, read, update and delete data in a database. The RRDBMS essentially serves as an interface between the database and end users or application programs, ensuring that data is consistently organized and remains easily accessible.

The RRDBMS manages three important things: the data, the database engine that allows data to be accessed, locked and modified -- and the database schema, which defines the database's logical structure. These three foundational elements help provide concurrency, security, data integrity and uniform administration procedures. Typical database administration tasks supported by the RRDBMS include change management, performance monitoring/tuning and backup and recovery. Many database management systems are also responsible for automated rollbacks, restarts and recovery as well as the logging and auditing of activity.

The RRDBMS is perhaps most useful for providing a centralized view of data that can be accessed by multiple users, from multiple locations, in a controlled manner. A RDBMS can limit what data the end user sees, as well as how that end user can view the data, providing many views of a single database schema. End users and software programs are free from having to understand where the data is physically located or on what type of storage media it resides because the RDBMS handles all requests.

The RDBMS can offer both logical and physical data independence. That means it can protect users and applications from needing to know where data is stored or having to be concerned about changes to the physical structure of data (storage and hardware). As long as programs use the application programming interface (API) for the database that is provided by the RDBMS, developers won't have to modify programs just because changes have been made to the database.

With relational RDBMS (RDBMS), this API is SQL, a standard programming language for defining, protecting and accessing data in a RDBMS.

II] OBJECTIVE OF THE ADD-ON COURSE: -

1. To know the concept of RDBMS.
2. To understand how to Manage Database .
3. To Create, update the Database .

This course, part of the Oracle program, will provide the essential skills you need for success. RDBMS is play a vital role in the Software because every Software having Front end and backend, so RDBMS can play a vital role in backend to store the information which can be coming from any frontend language.

This 3 months course in RDBMS can be a good start for those who are looking for a good career in Database Industry.

III] OUTCOME OF THE ADD-ON COURSE: -

In this course, students will learn the art of creating user-friendly database,

- Creating database manually.
- Fired the DML and DDL Operations.
- Fetch the data from database.

IV] Course Duration: 30 Hours

VIJ SYLLABUS :

SR. NO	TOPIC NAME	HOURS
1	Introductory concepts of RDBMS : Introduction and applications of RDBMS, Purpose of data base, Data, Independence, Database System architecture- levels, Mappings, Database, users and DBA	02
2	Relational Model : Structure of relational databases, Domains, Relations, Relational algebra – fundamental	03

	operators and syntax, relational algebra queries, tuple relational calculus	
3	Entity-Relationship model : Basic concepts, Design process, constraints, Keys, Design issues, E-R diagrams, weak entity sets, extended E-R features – generalization, specialization, aggregation, reduction to E-R database schema	04
4	Relational Database design Functional Dependency – definition, trivial and non-trivial FD, closure of FD set, closure of attributes, irreducible set of FD, Normalization – 1Nf, 2NF, 3NF, Decomposition using FD- dependency preservation, BCNF, Multi- valued dependency, 4NF, Join dependency and 5NF	05
5	Query Processing & Query Optimization : Overview, measures of query cost, selection operation, sorting, join, evaluation of expressions, transformation of relational expressions, estimating statistics of expression results, evaluation plans, materialized views	03
6	Transaction Management : Transaction concepts, properties of transactions,	06

	<p>serializability of transactions, testing for serializability, System recovery, Two- Phase Commit protocol, Recovery and Atomicity, Log-based recovery, concurrent executions of transactions and related problems, Locking mechanism, solution to concurrency related problems, deadlock, , two-phase locking protocol, Isolation, Intent locking</p>	
7	<p>Security: Introduction, Discretionary access control, Mandatory Access Control, Data Encryption</p>	05
8	<p>SQL Concepts : structure – creation, alteration, defining constraints – Primary key, foreign key, unique, not null, check, IN operator, Functions - aggregate functions, Built-in functions – numeric, date, string functions, set operations, sub-queries, correlated sub-queries, Use of group by, having, order by, join and its types, Exist, Any, All , view and its types. transaction control commands – Commit, Rollback, Savepoint</p>	02

QUESTION PAPER

Academic Year 2019-2020

Course Coordinator: Mr.Faheemuddin

Class: TYBBA (CA) January - 2020

Question 1: _____ indicates the maximum number of entities that can be involved in a relationship?

- (A) Minimum cardinality
- (B) Maximum cardinality
- (C) ERD
- (D) Greater Entity Count

Question 2: ER Model Comes under _____ .

- (A) Physical data Model
- (B) Record based logical Model
- (C) Object based logical Model
- (D) None of Above

Question 3: Referential integrity is directly related to _____ .

- (A) Relation key
- (B) Foreign key
- (C) Primary key
- (D) Candidate key

Question 4: A _____ is a query that retrieves rows from more than one table or view.

- (A) Start
- (B) End
- (C) Join

(D) None of the mentioned

Question 5: Which of the following creates a virtual relation for storing the query ?

(A) Function

(B) View

(C) Procedure

(D) None of the above

Question 6: Which of the following is true concerning systems information in an RDBMS?

(A) RDBMS store database definition information in system-created tables.

(B) This information can be accessed using SQL.(C) Procedure

(D) This information often cannot be updated by a user.

(B) All of the above.

Question 7: PL/SQL is a completely portable, _____ transaction processing language.

(A) Low-performance

(B) High-performance

(D) Both 1 & 2

(B) None of the above

Question 8: _____ is a procedural language.

(A) Domain relational calculus

(B) Relational algebra

(C) Tuple relational calculus

(D) Query language

Question 9: PL/SQL stands for -

(A) Portable Language/SQL

(B) Programming Language/SQL

(C) Procedural Language/SQL

(D) None of these

Question 10: _____ forms have a relation that possesses data about an individual entity.

(A) 2NF

(B) 3NF

(C) 4NF

(D) 5NF

Question 11: Referential integrity is directly related to _____ .

(A) Relation key

(B) Foreign key

(C) Primary key

(D) Candidate key

Question 12: E-R modeling technique is _____ .

- (A) Tree structure
- (B) Top-down method
- (C) Bottom-up method
- (D) Right-left approach
- (E) Top-down method

Question 13: PL/SQL has two types of subprograms, procedures and functions. Which of the following subprogram is used to compute a value?

- (A) Procedure
- (B) Function
- (C) Both A & B
- (D) All of the above

Question 14: What type of join is needed when you wish to include rows that do not have matching values?

- (A) Equi-join
- (B) Natural join
- (C) Outer join
- (D) All of the above

Question 15: _____ is a single-entity instance of one type related to many entity instances of another type?

- (A) One-to-One Relationship
- (B) One-to-Many Relationship
- (C) Many-to-Many Relationship
- (D) Composite Relationship

Question 16: Properties that describe the characteristics of entities are called _____.

- (A) Entities
- (B) Attributes
- (C) Identifiers
- (D) Relationships

Question 17: _____ is the function of the union operation?

- (A) It combines the results of any two different queries
- (B) It combines the results of two different queries which have the same set of attributes in the select clause
- (C) It combines the results of two different queries which have the same condition in the where clause
- (D) It gives the Cartesian product of the results of any 2 queries

Question 18: In relation algebra a new term was defined by codd as _____:

- (A) Relation
- (B) Relation completeness
- (C) Relation operation
- (D) Relation selection

Question 19: _____ is a unary operation.

- (A) Selection operation
- (B) Primitive operation
- (C) Projection operation
- (D) Generalized selection

Question 20: How many primitive operators of relation algebra as proposed by cod?

- (A) 2
- (B) 3
- (C) 4
- (D) 6

Question 21: _____ is based on specifying a number of tuple variables?

- (A) Tuple relation calculus
- (B) Domain relational calculus
- (C) Both
- (D) None of above

Question 22: Which of the followings are not the types of PL/SQL records?

- A) View-based
- (B) Table-based
- (C) Cursor-based records
- (D) User-defined records

Question 23: The term attribute refers to a _____ of a table.

- (A) Record
- (B) Column
- (C) Tuple
- (D) Key

Question 24: It refers to set of one or more columns that designates the _____ in a referential integrity constraint.

- (A) Select key
- (B) Foreign key
- (C) Write key
- (D) None of the above

Question 25: PL/SQL subprograms, unlike anonymous blocks, are compiled each time they are executed.

- (A) True
- (B) False

Question 26: _____ Data type is not allowed in the definition of PL/SQL record.

- (A) A Collection
- (B) A Scalar
- (C) Both A & B
- (D) None of the above

Question 27: For each attribute of a relation, there is a set of permitted values, called the _____ of that attribute.

- (A) Domain
- (B) Relation
- (C) Set
- (D) Schema

Question 28: Which join refers to join records from the write table that have no matching key in the left table are include in the result set?

- (A) Left outer join
- (B) Right outer join
- (C) Full outer join
- (D) Half outer join

Question 29: Trigger are supported in _____ .

- (A) Delete
- (B) Update
- (C) Views
- (D) All the above

Question 30: PL/SQL is a block structured language.

- (A) True
- (B) False

Report

“CERTIFICATE COURSE IN RELATIONAL DATABASE MANAGEMENT SYSTEM (RDBMS)”

Certificate Course in “**RELATIONAL DATABASE MANAGEMENT SYSTEM**” has been conducted for SYBBA (CA) Students from 10th Jan to 27th Jan 2020, to develop their Skills in the field of database. A certificate program in database technology provides a basic foundation for a career in this field, with courses in database security, administration and development.

The Objective:

The objective of the course is to present an introduction to Relational database management systems, with an emphasis on how to organize, maintain and retrieve - efficiently, and effectively - information from database.

Course Outcome:

- i. have a broad understanding of database concepts and database management system software
- ii. have a high-level understanding of major DBMS components and their function
- iii. Be able to model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
- iv. Be able to write SQL commands to create tables and indexes, insert/update/delete data, and query data in a relational DBMS.
- v. Be able to program a data-intensive application using DBMS APIs

Beneficiaries:

Total Number of beneficiaries Participated in Certificate Course was **33**.

In accordance with the course plan, syllabus has been designed with the help of board studies and insight had been taken by industry experts.

Topics Covered in Course work is:

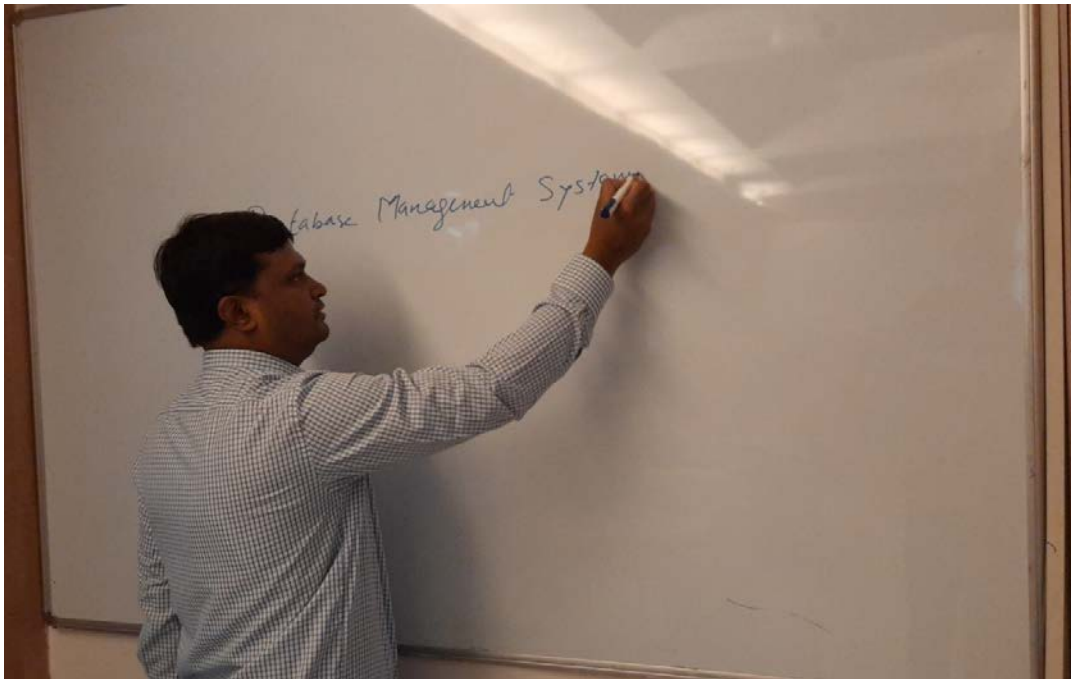

- ✓ Introduction to RDBMS
- ✓ Structured Query Language (SQL)
- ✓ PL/SQL Programming
- ✓ Cursor, Trigger, Function, Package, Procedure
- ✓ Application Development. Case Studies. Storage and File Structure

- ✓ Indexing and Hashing. Query Processing
- ✓ Query Optimization. Transactions (Serializability and Recoverability)
- ✓ Concurrency Control. Recovery Systems.

CERTIFICATE:

- Certificate will be given to the students who register for the course and appear for the exam, which will be conducted after completion of the course. Candidates scoring 40% and above will be awarded the certificate.

I] DESCRIPTION OF THE CERTIFICATE COURSE: -

Testing is the process of evaluating a system or its component(s) with the intent to find whether it satisfies the specified requirements or not. Testing is executing a system in order to identify any gaps, errors, or missing requirements in contrary to the actual requirements.

This tutorial will give you a basic understanding on software testing, its types, methods, levels, and other related terminologies.

WHAT IS AUTOMATION TESTING?

Automation Testing or Test Automation is a software testing technique that is performed using special automated testing software tools to execute a test case suite. In Automation testing, test data is entered into the System Under Test to compare expected and actual results for generating detailed test reports. It demands considerable investments of money and resources.

WHO DOES TESTING?

It depends on the process and the associated stakeholders of the project(s). In the IT industry, large companies have a team with responsibilities to evaluate the developed software in context of the given requirements. Moreover, developers also conduct testing which is called Unit Testing. In most cases, the following professionals are involved in testing a system within their respective capacities –

- Software Tester
- Software Developer
- Project Lead/Manager
- End User

Different companies have different designations for people who test the software on the basis of their experience and knowledge such as Software Tester, Software Quality Assurance Engineer, QA Analyst, etc.

It is not possible to test the software at any time during its cycle. The next two sections state when testing should be started and when to end it during the SDLC.

II] OBJECTIVE OF THE CERTIFICATE COURSE: -

1. To know the concept of software testing.
2. To understand how to test bugs in software.
3. To develop programming logic.
4. Build an end-to-end application and test it with exciting features

This course, part of the Software Testing and Verification program, will provide the essential skills you need for success. Software needs to be tested for bugs and to insure the product meets the requirements and produces the desired results. Software testing is essential to providing a quality product.

Learn the techniques Software Testers and Quality Assurance Engineers use every day, which can be applied to any programming language and testing software.

This course in Automation testing can be a good start for those who are looking for a good career in Software Testing Industry.

III] OUTCOME OF THE ADD-ON COURSE: -

In this course, students will learn the art of creating user-friendly,

- Develop, document and execute software test cases
- Create a software test to meet an objective
- Identify types of software defects

EVALUATION FEBRUARY 2020

CLASS: - TYBBA (CA)

MARKS - 20

1. A deviation from the specified or expected behavior that is visible to end-users is called:

- A. An error
- B. a fault
- C. a failure
- D. a defect

Ans: C

2. In case of Large Systems

- A. Only few tests should be run
- B. Test Cases written by good test engineers should be executed
- C. Only Good Test Cases should be executed
- D. Testing should be on the basis of Risk

Ans: d

3. The test language usually used in Selenium is _____.

- A. PHP
- B. Python
- C. JavaScript
- D. None of the above

Ans: C

4. Selenium tests _____.

- A. DOS applications
- B. Browser-based applications
- C. GUI applications
- D. None of the above

Ans: B

5. Which selenium command check whether specific text exists somewhere on the page?

- A. verifyTextPresent
- B. verifyTextPresent
- C. CheckTextPresent
- D. VerifyPresentText

Ans: A

6. What is Selenium IDE?

- A. Windows Software
- B. Firefox Plug-in
- C. Java Software
- D. Flash Plug-in

Ans: B

7. Which of the following is a static test?

- A. Coverage analysis
- B. Code inspection
- C. Usability assessment
- D. Installation test

Ans: B

8. What is a test suite made of?

- A. Test packs
- B. Tests
- C. Test blocks
- D. Test pattern

Ans: B

9. Select the component which is NOT part of the Selenium suite.

- A. Selenium IDE
- B. Selenium RC
- C. selenium grid
- D. Selenium Web

Ans: D

10. Selenium IDE stands for

- A. Selenium Initialization Development Environment
- B. Selenium Interrelated Development Environment
- C. Selenium Integrated Development Environment
- D. Selenium Information Development Environment

Ans: C

11. Which of the following is not the integration strategy?

- A. Design based
- B. Bottom-up
- C. Big-bang
- D. Top-down

Ans: A

12. The Selenium RC is used

- A. To run your test against different browsers (except HtmlUnit) on different operating systems.
- B. To create tests with little or no prior knowledge in programming.
- C. To test a web application against Firefox only.
- D. To run a huge test suite, that can be executed on multiple machines.

Ans: A

13. The Selenium

- A. Provides professional customer support
- B. Test Reports are generated automatically
- C. Comes with a built-in object repository
- D. Cannot access elements outside of the web application under test

Ans: D

14. Which of the following is likely to benefit most from the use of test tools providing test capture and replay facilities?

- A. Integration testing
- B. Regression testing

- C. System testing
- D. User acceptance testing

Ans: B

15. Which is non-functional software testing?

- A. Unit Testing
- B. Block box testing
- C. Performance Testing
- D. Regression testing

Ans: C

16. The name of the testing which is done to make sure the existing features are not affected by new changes

- A. Recursive testing
- B. Whitebox testing
- C. Unit testing
- D. Regression testing

Ans: D

17. _____ is a process which is intended to reveal flaws in the security mechanisms of an information system that protect data and maintain functionality as intended.

- A. Integrity Testing
- B. Unit Testing
- C. Security Testing
- D. Stress testing

Answer: C

18. The testing which is done by going thro' the code is known as,

- A. Unit Testing
- B. Blackbox testing
- C. White box Testing
- D. Regression testing

Ans: C

19. Which is Black-Box Testing method?

- A. equivalence partitioning
- B. code coverage
- C. fault injection

Ans: A

20. Test cases are designed during:

- A. test recording
- B. test planning
- C. test configuration
- D. test specification

Ans: D

21. Can Google chrome be supported by Selenium IDE?

- A. Yes
- B. No

Ans: B

22. Can the Unix operating system be supported by Selenium IDE?

- A. No
- B. Yes

Ans: A

23. Which command can be used to enter values into text boxes?

- A. sendsKeys()
- B. sendKey()
- C. sendKeys
- D. sendKeys()

Ans: D

24. Select the language which is supported by The Selenium Web Driver

- A. Perl
- B. SQL
- C. ASP
- D. Cobol

Ans: A

25. Which Selenium component supports All Operating System?

- A. Selenium Generator
- B. Selenium IDE
- C. Selenium WebDriver

Ans: C

26. Select the command in Selenium IDE used to open a page using the URL.

- A. OpenRecord
- B. Open
- C. OpenText
- D. OpenTable

Ans: B

27. In the case of Selenium IDE, the Source view shows your script in

- A. DHTML format
- B. J2EE format
- C. XML format
- D. HTML format.

Ans: C

28. The Actions commands

- A. are commands that directly interact with page elements.
- B. are commands that allow you to store values to a variable.
- C. are commands that verify if a certain condition is met.

Ans: A

29. Select the command which is used to check the presence of a certain element.

- A. verifiable
- B. verifyTitlePresent
- C. verifyTextPresent
- D. verifyElementPresent

Ans: D

30. Select the command which is used to print a string value or a variable in Selenium IDE.

- A. The 'display' command
- B. The 'echo' command
- C. The 'print' command
- D. The 'printr' command

DEPARTMENT OF BBA-CA

A REPORT ON

CERTIFICATE COURSE IN AUTOMATION TESTING

The Department of BBA-CA organized a 30 hour Certificate course in Software testing for the students of T.Y.BBA(CA) Level. This course was designed and coordinated by Assistant Professor Ms. Shabana Mulla under the able guidance of Principal Prof.(Dr.) Aftab Anwar Shaikh. 37 students attended this

certificate course. The students were provided data about the course description, objectives, outcome, duration, syllabus, methodology and obviously the course content.

The Objective Of the Certificate Course: -

1. To know the concept of software testing.
2. To understand how to test bugs in software.
3. To develop programming logic.
4. To prepare test cases, test

scenario,

5. To perform test execution and Log defect and perform retesting,
6. How to contribute to Automation Testing.
7. Build an end-to-end application and test it with exciting features

This course, part of the Software Testing and Verification program, will provide the essential skills students need for success. Software needs to be tested for bugs and to insure the product meets the requirements and produces the desired results. Software testing is essential to providing a quality product. Learn the techniques Software Testers and Quality Assurance Engineers use every day, which can be applied to any programming language and testing software. The course was divided into two parts the first part was conducted by the coordinator Assistant Professor Ms. Shabana Mulla herself whereas the second part were conducted by Experts from different IT industry.

Mr. Faheemuddin Ahmed Falicitating to Guest speaker Mr. Vishal Gosavi

The Speaker Mr. Vishal Gosavi, Trainer, **ABCIS Pvt. Ltd.** has taken hand workshop for testing and designing Test Case on **“Software Testing: Manual Testing & Designing Test Cases”**

on 17/01/2020 . Speaker has explained Role of Test engineer in various criteria. Students learnt about How to Prepare test cases, test scenario, How to Perform test execution and Log defect and perform retesting, How to Contribute to Automation Testing , Follow "Agile " methodology , How to Help client to prepare test plan Maintain quality for all test artifacts.

Testing is executing a system in order to identify any gaps, errors, or missing requirements in contrary to the actual requirements. The objective of this workshop is to help Students understand the real life web development and become a web developer using latest tools and trending technologies of current and future. The course outline is designed in such a manner that almost no prior knowledge is required to master the technology. Once completed the course successfully, the trainees are going to have their own live websites and clear understanding of how do real time web developers work in MNCs and other software companies.

The Speaker **Mr. Vivek Puranik, ABCIS Pvt. Ltd**, Pune has taken hand workshop on **Automation Testing** writing Test Cases , working of software testing tools and

current trends in software testing on 18/01/2020.

Testing is the process of evaluating a system or its component(s) with the intent to find whether it satisfies the specified requirements or not.

Testing is executing a system in order to identify any gaps,

errors, or missing requirements in contrary to the actual requirements. Speaker has explained Role of Test engineer in various criteria. Students learnt about How to Prepare test cases, test scenario, How to Perform test execution and Log defect and perform retesting, How to contribute to Automation Testing.

Sir has given live demo of **Selenium testing** tool. It is a portable framework

for testing web applications. Selenium provides a playback (formerly also recording) tool for authoring functional tests without the need to learn a test scripting language). ... The tests can then run against most modern web browsers. Selenium is one of the most popular tools used for automating web applications. It is an open source tool used for the execution of test scripts or test cases on web applications. Selenium supports various programming languages such as Java, C#, PHP, JavaScript, Ruby, and Python.

Sir also focused on Manual testing which is the process of manually testing software for defects. It requires a tester to play the role of an end user and use most of all features of the application to ensure correct behavior. To ensure completeness of testing, the tester often follows a written test plan that leads them through a set of important test cases.

The Course Outcome was as follows:

In this course, students learnt about

- Developing document and execute software test cases
- Create a software test to meet an objective
- Identify types of software defects & Finding test bugs in software.
- Preparation of test cases, test scenario,
- Performing test execution and Log defect and perform retesting,
- Automation Testing.

Feed Back from the Students:

The FeedBack was taken from the students about the certificate course in Automation testing regarding course content, Guest Lectures, Content of guest lecture etc. Students highly appreciated the fact that a course of this kind was

organized for them. They were extremely thankful to the principal and staff for diligently planning and executing this course.

Certificate Course on “Disaster Management in India”

Curriculum

The main objective of this chapter is to have a basic understanding of various concepts used in Disaster Management. The concepts explained here are: Disaster, Hazard, Vulnerability, Capacity, Risk and Disaster Management Cycle. Apart from the terminologies, the chapter also tries to explain various types of disasters. This chapter has been designed to upgrade your knowledge and skill so as to have a better understanding of natural hazards, disasters and their management.

Sr No	Unit	Details	Lectures
1	Introduction of Disasters	Understanding the Concepts and definitions of Disaster, Hazard, Vulnerability, Risk, Capacity – Disaster and Development, and disaster management	02
2	Types, Trends, Causes, Consequences and Control of Disasters	Geological Disasters (earthquakes, landslides, tsunami, mining); Hydro-Meteorological Disasters (floods, cyclones, lightning, thunder-storms, hail storms, avalanches, droughts, cold and heat waves) Biological Disasters (epidemics, pest attacks, forest fire); Technological Disasters (chemical, industrial, radiological, nuclear) and Manmade Disasters (building collapse, rural and urban fire, road and rail accidents, nuclear, radiological, chemicals and biological disasters) Global Disaster Trends – Emerging Risks of Disasters – Climate Change and Urban Disasters	02
3	Disaster Management Cycle and Framework	Disaster Management Cycle – Paradigm Shift in Disaster Management Pre-Disaster – Risk Assessment and Analysis, Risk Mapping, zonation and Microzonation, Prevention and Mitigation of Disasters, Early Warning System; Preparedness, Capacity Development; Awareness During Disaster – Evacuation – Disaster Communication – Search and Rescue – Emergency Operation Centre – Incident Command System	03

		– Relief and Rehabilitation – Post-disaster – Damage and Needs Assessment, Restoration of Critical Infrastructure – Early Recovery – Reconstruction and Redevelopment; IDNDR, Yokohama Strategy, Hyogo Framework of Action	
4	Disaster Management in India	Disaster Profile of India – Mega Disasters of India and Lessons Learnt Disaster Management Act 2005 – Institutional and Financial Mechanism National Policy on Disaster Management, National Guidelines and Plans on Disaster Management; Role of Government (local, state and national), Non-Government and Inter Governmental Agencies	01
5	Basic Concepts of Disaster Management:	Objective: To familiarize the Students with the concepts, terminologies and developments in the field of Disaster Management and to inform them about the prospects of a Disaster Manager. i) Introduction – the necessity of studying Disaster Management (DM); the scope for a Disaster Manager ii) Disaster – Definition; Types of disasters; History of disasters; Components of disaster; Dimension of disasters; Phases of disaster. iii) Hazard – Definition; types of hazards; characteristic features, occurrence and impact of different types of hazards viz. natural hazards (including geo hazards), human induced hazards, environmental hazards, bio hazards; Hazard map of India. iv) Vulnerability – Definition; Types of vulnerability – physical vulnerability, socioeconomic vulnerability, vulnerability related to gender and age, rural & urban vulnerability; Vulnerability analysis with special reference to India. v) Disaster Risk – Definition; Significance; Factors of disaster risk; Disaster Risk analysis (with special reference to the Indian context) – Inter-relationship between Hazard, Vulnerability and Disaster Risk; Global disaster risk situation; Disaster risk situation of India; Hazard-Vulnerability maps of India; Case studies. vi) Disaster Management – Definition; Components of DM; Crisis Management; Risk Management; Disaster Management Cycle; Impact of disaster on development; UNISDR mandate in Disaster Relief & Management; IDNDR; Yokohama Strategy and Hyogo Framework – a ‘Paradigm shift’ in disaster management policy (policy for reduction of disaster consequences); India’s response to changes in DM Policy	03
6	Disaster Risk	Objective: To help the Students to learn how to assess disaster	03

		<p>of NGOs and Health workers in relief operations; Maintaining law and order.</p> <p>iv) Recovery- Decisions and actions related to rehabilitation and reconstruction taken after a disaster with a view to restoring or improving the pre-disaster living conditions of the affected community, while encouraging and facilitating necessary adjustments to reduce disaster risk.</p> <p>a) Rehabilitation – Damage Assessment; Need analysis of disaster affected people; Resource mobilisation for rehabilitation; Restoration of basic amenities – housing, drinking water, sanitation, medical facilities, power supply etc.; Creating Livelihood options.</p> <p>b) Reconstruction – Repair and reconstruction of roads, bridges, crossways, buildings, structures and establishments damaged or destroyed in the disaster; Restoration of operations of the service sector.</p> <p>c) Documentation – Documenting disaster; Lessons learnt; Updating DRM Plan for risk mitigation.</p>	
8	Disaster Risk Mitigation:	<p>Objective: To help the Students learn about the nature and characteristics of major natural disasters and how to mitigate the risk involved with such disasters.</p> <p>i) Earthquake Risk Mitigation – Earthquake, its Causes and Characteristic features; Magnitude and Intensity of earthquake; Major earthquakes; Seismic zoning; Earthquake vulnerability of India; Earthquake risk mitigation – Seismic performance examination of RCC Buildings, Retrofitting of vulnerable buildings, Construction of earthquake resistant buildings following proper BIS codes, Earthquake preparedness; Case study – ‘Bhuj Earthquake’.</p> <p>ii) Flood Risk Mitigation – Causes of Flood; Major floods; Flood vulnerability of India; Flood preparedness and mitigation; IT-tools and techniques of Flood Control; Preventive measures against floods (dams, barrages and embankments); Emergency response during floods; Case study – ‘The Deluge 2000’ (most devastating Flood in South Bengal till date).</p> <p>iii) Cyclone Risk Mitigation – Causes of Cyclone; its characteristics; Cyclone vulnerability of India; Cyclone preparedness; Forecast and early warning dissemination; Case study – ‘Orissa Super cyclone’.</p> <p>iv) Coastal degradation – Coastal erosion and Marine degradation; Wave Erosion; Tidal storm; Tsunami; Coastal Risk Mitigation; Measures for sea beach protection; Protection of Marine environment.</p> <p>v) Drought Risk Mitigation – Causes and characteristics of</p>	03

	Management:	<p>risk and prepare DRM Plans and how to implement them.</p> <p>i) Assessing Disaster Risk - Disaster Risk and Damage potential of disasters; Case studies on some major disasters and Lessons learnt there from (identification of the gaps causing the disasters); Assessment of Disaster Risk.</p> <p>ii) Ways of minimising disaster risk – Preparedness, Mitigation and Prevention – definition, specific interventions required for each, procedure to be followed and role of various stakeholders in each.</p> <p>a) Preparedness – Awareness generation; Information management; Early warning dissemination system; Community participation – Task force formation; Training and Capacity building; Preparedness plan preparation; Simulation.</p> <p>b) Mitigation – Knowledge of disaster specific risk; Analysing the mechanism of disaster damages and possible interventions for minimising the impact of disaster; Preparation of Mitigation plan.</p> <p>c) Prevention – Analysing the nature of a hazard and ways of minimising its intensity; Preparation of disaster prevention plan.</p> <p>iii) Disaster Risk Management (DRM) plan – Preparing Hazard-Vulnerability profile; Stakeholder analysis; Disaster risk assessment; Incorporation of Preparedness, Mitigation and Prevention plans.</p> <p>iv) Implementing DRM plan – Sharing DRM plan with all stakeholders; Division of Roles and responsibilities as per DRM plan; Resource mobilisation; Monitoring and Evaluation.</p> <p>v) Role of Risk transfer and insurance in DRM</p>	
7	Emergency Response and Crisis Management	<p>Objective: To help the Students to learn how to prepare Crisis Management plans how to respond to a disaster so as to restore normalcy at the earliest and how to document the whole process for guidance in future.</p> <p>i) Crisis Management – Rescue, relief, rehabilitation and reconstruction; Crisis Management plan; Case studies.</p> <p>ii) Emergency response – Standard Operation Procedure (SOP) for disaster response; Information Management System; Warning Dissemination; Evacuation; Search and Rescue operations; Relief operations; Emergency Operation Center (EOC); Resource Management & Networking – India Disaster Resource Network; Role of Disaster Response Forces and Community Based Organisations (CBO) in emergency response mechanism.</p> <p>iii) Relief Operations – Arranging for Temporary shelter, Food, Safe drinking water, Sanitation and Medical aids; Role</p>	03

		<p>of NGOs and Health workers in relief operations; Maintaining law and order.</p> <p>iv) Recovery- Decisions and actions related to rehabilitation and reconstruction taken after a disaster with a view to restoring or improving the pre-disaster living conditions of the affected community, while encouraging and facilitating necessary adjustments to reduce disaster risk.</p> <p>a) Rehabilitation – Damage Assessment; Need analysis of disaster affected people; Resource mobilisation for rehabilitation; Restoration of basic amenities – housing, drinking water, sanitation, medical facilities, power supply etc.; Creating Livelihood options.</p> <p>b) Reconstruction – Repair and reconstruction of roads, bridges, crossways, buildings, structures and establishments damaged or destroyed in the disaster; Restoration of operations of the service sector.</p> <p>c) Documentation – Documenting disaster; Lessons learnt; Updating DRM Plan for risk mitigation.</p>

“Disaster Management in India” Certificate Course Report- 2019

The Department of Geology had organized a 30 hours certificate course on “**Disaster Management in India**” and it was successfully conducted in the Geology Laboratory. Dr. Sajid Hundekar was the coordinator of the certificate course.

Dr Sajid Hundekar along with Mr. Irfan Shaikh, Mr. Mohammad Ali Bangi and Mr. Amarjeet Bhagat had drafted the course for total 30 hrs. Theory and Practicals. The team has successfully tied up with PMC Fire Brigade Station, Lohianagar, Pune and Dial 101 Emergency Ambulance service for their assistance in conducting theory and practical sessions. Both the organizations had to send their representatives to conduct the sessions in college premises and their premises in Lohianagar.

The inaugural function of the certificate course on “Disaster Management in India” was organized on 16th July 2019 at 10.00 a.m. in the Department of Geology Laboratory followed by the registration of students. On the occasion Mr. Iqbal Shaikh, Vice Principal Science Faculty, was the chief guest along with guest of honour Mr. Sameer Shaikh Fire fighting Officer, PMC fire fighting Station Lohianagar Pune, Dr. M. R. G. Sayyed HOD, Department of Geology and Geology staff members and students were present on that occasion.

Chief Guest Mr. Iqbal Shaikh, Vice Principal Poona College was addressed the gathering and complimented to the Geology Department for starting the need based course for the students and involved the emergency services organization to give their practical training to the young budding citizens of India. He pointed out to the coordinator that the course should be kept open for all the faculty members and the students. Mr. Sameer Shaikh, the guest of honour told students that he has directly coming from the disaster sight in Ghorpadigaon. He has express his desire to interact with the Poona College students and gave live incidence of his life and how a common man can take care of his or her as well as always be alert for any disaster happening in his surroundings with many examples. Mr. Sameer Shaikh impressed upon the need for students to remain vigilant and stay alert about any suspicious activities in public places and report any suspicious activity to the concern authorities to avoid a disaster.

Mr. Sameer Shaikh, fire-fighting officer shared his personal experience with the students and enlightened them as to what could be done in such scenarios. Simple hacks as to what could be done in case of road accidents, accidental fires were explained by him. The function progressed ahead with Dr. Sajid Hundekar the Coordinator addressing the students and explaining the importance of the course and the impact it can have in one’s life. A well trained individual will be able to save himself along with many others who are helpless.

Mr. Irfan Shaikh presented the Vote of Thanks, also informed about unavailability Dr. Asif Ahmed, Emergency Medical Officer who had expressed his willingness to visit and interact with the students at some other time.

After the Program concluded Mr. Saud Dhunware (T.Y.B.Sc student) along with Miss Aasiya Chivilkar (S.Y.B.Sc student) helped in the registration process and a total of **51** students from F.Y.B.Sc, S.Y.B.Sc and T.Y.B.Sc Geology classes enrolled for the course. The schedule of the certificate course was displayed on the notice board and topics are divided among the staffs to conduct the session hereafter.

Dr. Asif Ahmed explained how they help the people in emergency services. He conducted the theory lecture and explained the anatomy and physiology of the human. He explained the precautionary methods to be taken when anyone is handling the electric instruments, fire, machineries, while driving and walking on the road, etc. He stressed on observing the things happening in and around us and to respond spontaneously while giving alert signals to the others to minimize the damages and casualties. He also demonstrated the emergency medical techniques and explained practical use of the various medical equipments.

Mr. Sameer Shaikh Fire-fighting Officer conducted the theory sessions followed by a Practical session at Lohianagar Fire Station, Pune. The visit was scheduled at 9:00 a.m. all the students were informed well in advance about how to reach the place. Thereafter Mr. Sameer Shaikh who had arranged for a demonstration explained the various equipment and their uses. Demonstrated fire incidences and explained how to combat them. Multiple techniques involving different vehicles, along with their benefits and limitations. The entire Practical lasted till 2:00 pm. Prof. Irfan Shaikh presented the vote of thanks to the Firefighting Station Lohianagar, and all the officers present who helped in the demonstration.

On 2nd August 2019 a concluding function was organized in the Department of Geology at 10.00 a.m. Mr. Amarjeet Bhagat and Mr. Mohammad Ali Bangi conducted the program. Mr Irfan Shaikh presented the course completion report. On this occasion the course completion certificates were distributed to the registered students at the hands of Head of Geology Department Dr. M R G Sayyed.

We are in the world where the showcasing is a very important as well as getting essential. We may have seen various advertisements in newspaper, holding boards, glow sign, handouts even in TV and cinemas also. Everyone wants to promote their services or products in an effective manner. Not only the promotion of products and services, sometimes information in form of booklets, handbooks, prospectus etc. are also needed for better understanding and delivery of services. A person with good knowledge of designing such articles is very much in demands especially by the advertising and publishing industry.

Desktop Publishing Courses deals with educating the students about the use of software for designing and creation of different types of documents.

The main objectives for conducting this activity are:

- To provide the participants understanding of the techniques essential to build their career in desktop publishing using suitable hardware and software tools.
- To makes the participants exactly suitable for DTP Industry.
- To demonstrate competency with the basic uses of Adobe InDesign by creating a variety of projects that incorporate the integration of text and graphics (i.e. brochures, newsletters, magazines etc.)

Name of the Course Coordinator: **Mr. Musharraf Hussain**

Introduction and Motivation

In India, electricity is available in very urban location such as residential, commercial, household and Industrial. Proper electrical wiring makes it possible for its effective utilization in residences, offices, laboratories, institutions etc. Any interruption in the electrical power due to accidental failure throws the normal routine out of control. Due to its dangerous nature, people are highly scared to attempt any maintenance and repairs work. One has to only wait for trained skilled technicians who may take long leading to loss of precious time.

The intension to handle such crises effectively motivated the introduction of this course by providing skilled manpower.

Course Outcome

Ten (10) students had enrolled for the course, which included eight male and two female students' thereby ensuring gender justice. From the enrolled students, seven (07) actually appeared for the Examination, all of whom successfully qualified in the Examination. Out of seven (07) students who appeared, six (06) students passed in 'First Class with Distinction' division while one (01) student passed in 'First Class' division.

This course has successfully trained undergraduate students in Electrical wiring while pursuing their graduation in just six months. The students have successfully acquired skills which may come to effective use anytime; anywhere thereby enhanced their competencies widely that too while pursuing their normal graduation studies. Later if need arises, they can also start-up their own professional setups offering such services.

After successful completion of this course, the students are able to

- Check & repair house wiring and electrical appliances.

French is one of the most popular and widely spoken languages in the world. It also brings a lot of benefits for students in their communication skills, economic and cultural gateways. It is essential to learn the French language because most of the MNC in India are from Europe, and the majority of them have their origin traceable in France. French is vital for students to learn because it is the most popular choice among Indian students studying a foreign language.

The French language opens up windows of opportunities. A lack of French study is one reason people struggle to land big-time jobs involving languages with some MNCs in India. French enables a student to overcome the language barrier in most places of the world, particularly in Europe where the language reigns supreme.

Learning the French language adds more firepower to one's resume. For instance, India has a population of over 1.3 billion and it's seen as an attractive market for hundreds of multinational companies. Most of these multinational companies come from Europe and other continents where French is widespread publicly. These have raised the stake for job seekers to learn a foreign language, and one of which is French. One's ability to speak French and English puts them ahead of others in finding a job in most BPO, KPO, IT, and MNCs. One will be an asset in the companies that use French as their working and interactive language. One can comfortably secure jobs in a wide range of sectors such as in the automobile, aeronautical luxury goods, retailing, etc.

After successful completion of this course, students must be able to -

1. Demonstrate knowledge of literary and cultural traditions, such as major movements, writers, and works of the French-speaking world, focusing on at least one and ideally multiple traditions: European, African, Caribbean, Asian, North American, and other Francophone cultures.
2. Demonstrate the skills necessary for scholarly research and writing in the Humanities.

Keeping this in mind the Department of BBA has decided to offer certificate course in French Language in collaboration with Maharashtra State Board of Vocational Education Examination. This course attempts to train undergraduate students in Foreign Language French while pursuing their graduation in just six months. Students of F.Y.B.BA. were encouraged to attend this course along with their regular course. A total **25 students** have registered in this course. The College has hired a professional instructor **Dr. Mangala Herkal** to carry out theory and practical sessions. The theory and practical sessions were conducted from **10/12/2019 to 24/01/2020**. Maharashtra State Board of Vocational Education Examination has conducted the theory and practical examinations during the last week of January 2020. **Out of 25 registered students, 20 students have appeared the examination and 10 students**

have passes the examination successfully. They also received certificates from Maharashtra State Board of Vocational Education Examination. The students have acquired necessary skills during this training and they are now able to

- To be able to understand the basic sentence patterns of French and German.
- To read, write speak understand the natives and be able to interact with them.
- To be able to converse confidently in French and German for their daily and business requirements

Report

Germany is the country that amuses the planet with innovations in automation, cars, and other technologies. The German Language has led to dive deep into the ocean of knowledge i.e. there are classics of literature, music, philosophy and social writing by great German believers. Europe becoming an exporter and biggest economy has increased the value of this vocabulary even more from a business perspective. One way to get into this world is through language.

It provides students and company aspirants with professional training in German language.. German Language through various actions and interaction. It helps students grasp the Language in a way that is better and to comprehend the core concepts. **German language** will provide students an opportunity for global certification in the German Language, which will be enhancing their career aspect. After completing this level students will not only learn the activities but gain insight on different aspects of the language like the **grammar, forming sentences, understanding conversations (even of the native speakers), develop your listening skills**, and further improve their ability to speak the language fluently. This course helps students in getting the leaders in the market by giving quality **German language training** where each individual has exceptional and transformative learning and living experience.

Course Objectives-

After successful completion of this course, students must be able to Demonstrate advanced proficiency in spoken and written German.

1. Demonstrate the ability to read critically, interpret analytically, speak persuasively, and write coherently about visual and literary texts produced in the German-speaking world.
2. Demonstrate familiarity with methodological approaches in the study of literary and cultural texts, such as close reading, socio-historical contextualization, and literary and cultural theory.
3. Demonstrate knowledge of literary and cultural traditions, such as major movements, writers, and works of the German-speaking world, focusing on at least one and ideally multiple traditions: European, African, Caribbean, Asian, North American, and other Francophone cultures.
4. Demonstrate the skills necessary for scholarly research and writing in German language

Keeping this in mind the Department of BBA has decided to offer certificate course in German Language in collaboration with Maharashtra State Board of Vocational Education Examination. This course attempts to train undergraduate students in German Language while pursuing their graduation in just six months. Students of F.Y.B.B.A are encouraged to attend this course along with their regular course. A total **25 students** had registered in this course. The College had hired a professional instructor **Ms. Shweta Shah** to carry out theory and practical sessions. The theory and practical sessions were conducted from **10/12/2019 to 24/01/2020**. Maharashtra State Board of Vocational Education Examination has conducted the theory and practical examinations during the last week of January 2020. **Out of 25 registered students, 20 students have appeared the examination and all 15 students have passed the examination successfully.** They also received certificates from Maharashtra State Board of Vocational Education Examination.
