Mahamana's Vision & NEP -2020

Education is the rudimentary building block in the creation of an inclusive, equitable and diverse knowledge society. In a pragmatic world where knowledge is gradually emerging as the principal production resource, the emergence of a host of intricate issues and challenges viz. internationalization, privatization, quality assurance, governance, nurturing of research & innovation and competition for scarce resources are inevitable. The Indian higher education system cannot afford to insulate itself from these vagaries. In parlance, it should be able to cater to the expectations and challenges of an increasingly globalized world without jeopardizing local culture and values. All actions should be taken to ensure that the objectives of higher education do not become vulnerable to the milieu. The Indian vision of education has always encouraged plurality of views as well as a rich tradition of dialogue and debate.

Mahamana was of the firm belief that a teacher has the potential to ignite the creativity of budding minds and ensure the growth of the students' social consciousness through pragmatic learning, thereby shaping the future of tomorrow's citizens as lifelong learners. Mahamana had envisioned maximizing the outreach of higher education with active engagement of inspirational leaders and stressed on combinations of modern and ancient knowledge & wisdom.

Mahamana's vision on higher education in resonance with the present era of National Education Policy-2020 entails:

- * To promote the idea of learning to know, learning to do, learning to be & learning to live together.
- * To enrich education system with the prevailing western models of education through adoption and integration of Indian vision into it for the development aimed at obtaining multi-disciplinary approach.
- * To promote the traditional wisdom & its inculcation in modern innovative thinking.
- * To invigorate strategic learning by instilling creativity, entrepreneurship & optimal allocation of educational resources for equity & equality.
- * To promote personality development of youth by building of character, making human values & ethics as integral part of education.
- * To disseminate the relevance of adoption with evolving world emphasizing pragmatic & innovative approach for holistic development & character building.

- * To focus on research and teaching, being the fundamental purposes of academic institutions for personal & holistic development.
- * To institutionalise international cooperation in developing creativity, critical thinking for promoting the skill of logical decision making, through autonomy, good governance & empowerment.
- * To instill deep sense of respect towards fundamental duties, constitutional values and responsibilities.
