## **Detailed Report**

## Workshop on: "Terrarium Making" for S.Y. and T.Y. BSc (Botany) students.

**14/02/2024:** A terrarium making workshop was organized for second-year (SY) and third-year (TY) BSc Botany students by Department of Botany, AKI's Poona College of Arts, Science & Commerce, Pune on 14<sup>th</sup> February, 2024. The workshop aimed to provide students with practical experience in creating and maintaining terrariums, while also fostering an appreciation for plant ecology and biodiversity.

Mrs. Neha Joshi (Natu), Founder of Ecomet Ecological Services, Pune was the resource person for the workshop. She began with an introduction to terrariums, including their history, types, and ecological significance. Following the introduction, students were familiarized with the materials and tools required for terrarium making.

Common materials such as glass containers, soil, gravel, activated charcoal, and various plants suitable for terrariums were discussed. She guided through the process of designing and assembling their terrariums: layering the terrarium substrate, planting appropriate species, and creating aesthetic arrangements. Students learned about the concept of enclosed ecosystems and how terrariums simulate natural habitats for plants by actually helping in making a terrarium.

Further, Mrs. Neha Joshi gave information on plant species suitable for terrariums, including succulents, ferns, mosses, and air plants. Also, she guided students on selecting plants based on their growth habits, light requirements,

and moisture preferences. Tips for terrarium maintenance, including watering, pruning, and monitoring environmental conditions, were also discussed. Students actively participated in creating their terrariums. They were encouraged to express their creativity by designing unique terrarium compositions.

The terrarium making workshop proved to be a valuable learning experience for SY and TY BSc Botany students. Through hands-on participation, students gained practical skills in terrarium design, assembly, and maintenance. The workshop not only enhanced students' understanding of plant ecology and biodiversity but also provided an opportunity for creative expression and reflection.

In all, 44 students participated in this innovative workshop under supervision and guidance co-ordinator Dr. Aafreen A. Ahmed. The staff of Department, Miss Nabila Shaikh gave a helping hand to students while hands-on session.

The enthusiastic participants presented a terrarium to the college authorities. They were appreciated for their efforts by Principal, Prof. (Dr.) Aftab Anwar Shaikh and Vice Principal Dr. Iqbal Shaikh.

## **DETAILED REPORT**

#### Debate competition on the topic Conventional Method of Plant Breeding Vs. Genetically Modified Organisms.

**14/02/2024:** To inculcate critical thinking and develop public speaking ability in the students Department of Botany has organized a debate competition on the topic Conventional Method of Plant Breeding Vs. Genetically Modified Organisms. Judge for the competition was Mr. Javed Sagri an expert plant breeder with several years of experience in agriculture sector.

Two teams were formed; each one is speaking on either Conventional Method of Plant Breeding or Genetically Modified Organisms. The team supporting conventional plant breeding argued for the merits of traditional breeding methods, emphasizing its long history of success and safety. The team advocating for GMOs presented a case for the benefits of biotechnology in agriculture, arguing that GMOs offer innovative solutions to global challenges.

After careful consideration of the arguments presented by both teams, the judge expressed his view and reached a decision. He declared conventional method of plant breeding team as winner. He acknowledged the merits of both conventional plant breeding and GMOs, he shared his field experience as well as gave career advice to the students.

Program concluded with prize distribution among all the participants.
